

Image Comparison

The menu item *Image Comparison* shows the images of the persons who last made a booking at a specific terminal. In this way, you can ensure that the person making the booking matches the stored image.

List of configurations

The list on the left-hand side contains the configurations created for image comparison. Select the entry for which you want to display images. Which configurations appear here is determined in the settings for alarm management.

Tab *Image*

Select this tab to display only the image for the last booking.

Tab *List*

Select this tab to display a continuous list of images for the bookings of the last hour.
