

# Security Log

Use the menu item *Security Log* to display a list of logins to JaniWeb. Failed attempts are also logged.

The screenshot shows the JaniWeb Security Log interface. The left sidebar contains a menu with various categories like 'Personen', 'Ungenutzte Ausweise', 'Besuche', 'Anwesenheit', 'Abwesenheiten', 'Qualifikationen', 'Alarmszenarien', 'Workflow', 'Scan über Buchungen', 'DSGVO Benutzer', 'DSGVO Personen', and 'Sicherheitslog'. The main area displays a table of login attempts with columns: Benutzer, IP-Adresse, Zeit, Fehler, Aktion, and App. The table shows a list of users and their login attempts, including successful logins and failed attempts (Fehler: yes).

Benutzer	IP-Adresse	Zeit	Fehler	Aktion	App

## Creating the report

- Specify the time period for which you want to generate the report (*From* – *To*). Or press *Today*, *Yesterday* or *Last week* to quickly generate a report for the corresponding period.
- (Optional) Select the *User* for whom you want to generate the report.
- Press *Run* to start the report.

# Further options with the report

- **Select columns to display:** Press the gear icon. Select which columns you want to display and in which order. Arrange the columns using the mouse or the arrow icons. Press *Apply* to adopt the changes.
- **Search in columns:** Enter text or numbers in the search field (magnifying glass icon) of a column to search for names, personnel numbers, or other criteria. The entries take effect immediately: the list only displays hits.
- **Export the entire list:** Press the download icon. Select the format in which you want to export the list. The export files are downloaded or displayed depending on the browser/operating system settings. For details on the available export formats, see the [General > Export Formats](#) chapter of this manual.
- **Save report:** For details on saving reports, see the chapter [General > Custom Reports](#).

## Button *Reset Selection*

Press *Reset Selection* to reset all fields to their initial value.
