

Server Log

Use the menu item *Server Log* to display a list of all system events.

Creating the report

- Specify the time period for which you want to generate the report (*From - To*). Or press *Last hour* to quickly generate a report for the last hour.
- (Optional) Select one or more *Log Levels* to narrow the report.
- Press *Run* to start the report.

Further options with the report

- **Search in columns:** Enter text or numbers in the search field (magnifying glass icon) of a column to search for names, personnel numbers, or other criteria. The entries take effect immediately: the list only displays hits.
- **Export the entire list:** Press the download icon. Select the format in which you want to export the list. The export files are downloaded or displayed depending on the browser/operating system settings. For details on the available export formats, see the [General > Export Formats](#) chapter of this manual.
- **Save report:** For details on saving reports, see the chapter [General > Custom Reports](#).

Button *Reset Selection*

Press *Reset Selection* to reset all fields to their initial value.
